

Corn Gluten Feed Pellets

Technical Information

Product Code 014414

Product Usage

Dried corn gluten feed usually contains 60-65% bran and 35-40% steep liquor, and may also include corn germ meal. Steep liquor is usually dried onto corn bran in a rotary drum dryer and ground in a hammer mill. Pelleting increases bulk density while increasing tryptophan, minimizing accumulation of fines, and allowing for easy handling and storage. Rich in protein, these pellets are primarily used as poultry, swine, and cattle feed. Corn gluten feed provides a high energy, low fat food source that is highly digestible and rich in crucial amino acids.
