

Corn Protein Feed Pellets

Technical Information

Product Code 014404

Product Usage

Dried corn protein feed usually contains 60-65% bran and 35-40% steep liquor, and may also include corn germ meal. Steep liquor is usually dried onto corn bran in a rotary drum dryer and ground in a hammer mill. Pelleting increases bulk density while increasing tryptophan, minimizing accumulation of fines, and allowing for easy handling and storage. Rich in protein, these pellets are primarily used as poultry, swine, and cattle feed. Corn protein feed provides a high energy, low fat food source that is highly digestible and rich in crucial amino acids.

Guaranteed Analysis

<u>Chemical Specifications</u>	<u>Limit</u>	<u>Methods</u>
Protein, % NLT	16.0	AOAC 990.03
Fat, % NLT	2.0	AOAC 2003.05
Fiber, % NMT	12.0	AOCS Ba 6a-05

Other Information

Ingredient Statement

Corn protein feed

Regulatory Information

Country of Origin: United States of America
 AAFCO #: 48.13
 IFN #: 5-02-903
 GMP+ Certified

Available Pack Size

Bulk Shipments: Truck or Railcar

Shelf life and Storage Information

Product has a 1-year shelf life from the date of manufacture. Bulk corn protein feed pellets should be managed to prevent internal heating.

Manufacturing Locations

Available From: Cedar Rapids, Iowa
